What is WRAMP?

Wetland and Riparian Area Monitoring Plan

comprehensive framework for monitoring and assessment of aquatic resources within the watershed or landscape context

What is WRAMP?

- WRAMP advises CA's Wetland and Riparian Area Protection Policy (WRAPP)
- EcoAtlas is a toolset that supports CA's three level monitoring and assessment framework

What is EcoAtlas?

A scientifically produced toolset to visualize the abundance, diversity and condition of aquatic resources within a landscape

ecoatlas.org

What is EcoAtlas?

Supports **wetland monitoring and reporting** throughout California

Aggregates different kinds of environmental data in one place

Provides **adaptable and customized reporting tools**

Status	In-progress	County	Solano
Project Type	Non-mitigation	Location	38.09541°N, -121.87327°W Map
Project Area (Acres)	2,129	Last Updated	19 July 2022
Project Abstract	This 4-stage project will restore about 1,820 acres of tidal wetlands, seasonal wetlands, intertidal ponds, vernal pools, and upland buffer zone habitats through the engineered placement of about 20 million cubic yards of agency-approved dredged sediment to raise the subsided site to elevations appropriate for intertidal marsh.
