

Technologies Transforming Environmental Protection

A two-day leadership conference addressing the environmental opportunities and challenges of rapid technological change

SAVE THE DATE

October 2-3, 2019

Bell Harbor International Conference Center
Seattle, WA

FOR MORE INFORMATION,
www.eli.org/TechConf2019

WHY ATTEND?

SEE how emerging technologies are supporting the circular economy and reducing and monitoring water and natural resource consumption, emissions, pesticide and chemical use, toxics, and other environmental impacts in these and other sectors.

- **Manufacturing**
- **Food Production**
- **Energy**
- **Retail, Data Storage, and Other Services**

LEARN how drones, artificial intelligence, and sensors are changing the way pollution is monitored and how our natural resources are used, consumed, recovered, recycled and assessed; what does the future hold?

PARTICIPATE in case studies and demonstrations by leaders from:

- **Major Tech and Tech-Intensive Companies**
- **Universities**
- **Governments**
- **Public Interest Groups**

ENGAGE with current and former environmental policymakers, business leaders, nonprofits, and academics in a discussion of how existing legal frameworks are addressing rapid technological change in the production of goods and services, and how environmental laws and regulations can and should evolve to adapt to that change.
